

Diversity, equity and inclusion

Nosotrxs maintains a diversity policy by recognizing the richness of the differences in our communities and collectives, without discrimination based on sexual orientation, gender, disability, ethnicity, origin or socioeconomic status.

We seek equal and universal recognition of rights for all people. We believe in equal opportunities and in the collective construction of a society of rights. The movement integrates groups of people with disabilities, migrant groups on the country's borders, domestic workers, indigenous communities in the Zoque and Mixteca zones to fight for their rights.

We work hand in hand with groups, whose rights have been violated. We believe that the voice of those who have been affected is much more powerful than the voice of any intermediary. We raise our voice collectively and empower the people to be included in institutional processes to advocate for their rights.
